LEADERS

ABOUT US

CSUN
ASCE

The California State University, Northridge (CSUN) Student Chapter of the American Society of Civil Engineers (ASCE) brings value and experience to students through hands-on experience within multiple engineering projects that prepare students for real world applications. These projects teach students that teamwork, communication, creativity, and ambition contribute to a strong, successful student chapter. Our mission statement is as follows:

To Inspire Leadership Development

To Bridge the Gap between Theory and Practice

To Facilitate an Environment in which Students Can Expand their Professional Relationships

To Provide the Knowledge and Experience Needed to Better Serve Our Communities

MAKE AN IMPACT.
BUILD AN EMPIRE.
LEAVE A LEGACY.

With a primary purpose “to inspire leadership development”, CSUN ASCE provides personal growth opportunities to its members through special projects, professional seminars, and involvement within the community. ASCE members are better prepared for the engineering industry as they apply innovative ideas and think critically in various student-led, volunteer-based special projects. These special projects apply theoretical skills to applicable and practical problems, yet still on a unique scale that is not often seen in the industry, challenging members to utilize their creativity and engineering skills to optimize performance. Each year, the special projects are put up to the challenge at the ASCE Pacific Southwest Conference (PSWC), competing with 18 other universities.

MAKE A CHANGE

CSUN ASCE has a membership body of over 150 students on campus. While the majority of members are aspiring civil engineers, the organization is inclusive of other disciplines. Your support will expose your company and brand to these students on campus. In addition, our presence on a regional and national level expands the exposure to thousands of alumni, other students, and professionals. In addition to monetary donations, our general body is always interested in having mentors, speakers, and site visits. CSUN ASCE's special projects are always looking to procure items through sponsors whether by donation or at a discounted price. There are so many great ways to extend your company's reach.

IT IS IN YOUR HANDS TO MAKE A DIFFERENCE

GOALS

For the 2019-2020 upcoming year, our goal is to increase our community service activities. Specifically, we plan to create school supply care packages, military care packages, plant trees, clean up beaches, volunteer at homeless shelters to feed the homeless, and many more service activities.

As firms invest in our future leaders, we plan to pay it forward and encourage younger students to enter the field of engineering. This upcoming year, we plan to create engineering based workshops for students.

ACCOMPLISHMENTS

CSUN
ASCE

Geowall Competed Successfully at the 2019 Pacific Southwest Conference

CSUN ASCE Successfully Hosted Engineering Girl Scouts Day on Campus

19 ASCE Members Graduated in the Spring of 2019

CSUN ASCE Successfully Co-Hosted Mini Pacific Southwest Conference in 2019
